About the Authors

WWAP would like to thank all the members of the WWAP Working Group on Sex-disaggregated Water Indicators who tirelessly worked for the finalization of this paper:

- Elisabetta Aurino, Research Fellow School of Public Health Imperial College London, Research Associate Oxford University, United Kingdom;
- Susan Bazilli, Director of International Women's Rights Project, Canada;
- Alice M. Bouman-Dentener, Honorary Founding President of the Women for Water Partnership, Member Steering Committee of European Water Stewardship, The Netherlands;
- Marcia Brewster, President of United Nations Association United States, consultant on water resources and gender issues, United States;
- Angela Calvo, Associate Professor at University of Turin, Italy;
- Alice Centrone, Gender and Rural Development Consultant, Researcher General Directorate for Development Cooperation Italian Cooperation, Italy;
- Moa Cortobius, Programme Officer UNDP Water Governance Facility, Gender Focal Point Stockholm International Water Institute (SIWI), Sweden;
- Emily Deschaine, Networking and Knowledge Management, Water Supply & Sanitation Collaborative Council (WSSCC), Switzerland;
- Anton Earle, Director African Regional Centre, Stockholm International Water Institute (SIWI), Sweden;
- Asma El Kasmi, UNESCO Chair "Water, Women and Decision Power", Al Akhawayn Unversity Ifrane, Morocco;
- Amber Fletcher, Ph.D., Johnson-Shoyama Graduate School of Public Policy, University of Regina, Canada;
- Christiane Froelich, Postdoc researcher Institute for Peace Research and Security Policy at Hamburg University, Germany;
- Giovanna Gioli, Research Group 'Climate Change and Security' (CLISEC), Hamburg University, co-founder of the international Gender, Climate Change and Conflict Network (GCCN), Germany;
- Frederique Holle, Policy Officer, Women for Water Partnership, The Netherlands;
- Inga Jacobs, Senior Researcher at Council for Scientific and Industrial Research (CSIR) South Africa;
- Eiman Karar, Executive Director for Management of Water Resources, Water Research Commission (WRC), South Africa;
- Evelyne Lyons, Independent consultant in Environmental Services Sector, France;
- Aishwarya Nair, Assistant Project Manager at Golder Associates, Editor-in-Chief wH20 Journal on Gender and Water, United States;
- Vasudha Pangare, Independent social development consultant and member of Gender and Water Alliance (GWA), Thailand;
- Carolyn Sachs, Professor of Rural Sociology and Women's Studies and Head of the Department of Women's Studies at Penn State University, United States;
- Viviana Re, Marie Curie Research Fellow, National Engineering School of Sfax (ENIS), Tunisia;
- Rosemary Rop, Water and Sanitation Specialist, World Bank, United States;
- Joni Seager, Professor and Chair, Global Studies Department, Bentley University, United States;
- Ilaria Sisto, Gender and Development Officer at FAO, Italy;

- Carolyn Sachs, Professor of Rural Sociology and Women's Studies and Head of the Department of Women's Studies at Penn State University, United States;
- Viviana Re, Marie Curie Research Fellow, National Engineering School of Sfax (ENIS), Tunisia;
- Rosemary Rop, Water and Sanitation Specialist, World Bank, United States;
- Joni Seager, Professor and Chair, Global Studies Department, Bentley University, United States;
- Ilaria Sisto, Gender and Development Officer at AO, Italy;
- Lyliose Umupfasoni, Programme Officer of Eastern Africa Sub Region at African Ministeria Council on Water (AMCOW), Director of Environment and Forestry, Ministry of Natural Resources, Rwanda;
- Barbara Van Koppen, Principal Researcher Poverty, Gender and Water, Southern Africa Regional Program, International Water Management Institute (IMWI), South Africa;
- Tom Williams, Programmes Director and Regional Group Director, International Water Association (IWA), The Netherlands;
- Lesha (B.M.) Witmer, Independent Expert on Water Governance and Sustainable Development, Steering Committee Member of the Women for Water Partnership, The Netherlands;
- Claudia Wendland, Water and Sanitation Specialist at Women in Europe for a Common Future (WECF), Germany;
- Seemin Qayum, Policy Advisor on Sustainable Development , UN Women;
- Kusum Athukorala, Chair of NetWater and the Sri Lanka Water Partnership;
- Emma Anakhasyan, Women for Water Partnership, Armenian Women for Health and Healthy Environment NGO;
- Nelson Gomonda, M&E project manager of African Ministers Council on Water (AMCOW).

We are grateful to the following colleagues at WWAP Secretariat for their valuable support: Michela Miletto, Diwata Hunziker, Valentina Abete, Simona Gallese, Vasudha Pangare and, in particular, to WWAP interns Alessio Lilli and Roselie Schonewille. We are equally grateful to UNESCO Publications Board, and to Gulser Corat and Cvetan Cvetkovski of UNESCO Division for Gender Equality.

The questionnaire was formulated by the members of WWAP Working Group on Sex-Disaggregated Indicators, between January and December 2014, under the coordination of Francesca Greco. The material was prepared and edited between January and August 2015. The list of questions is based on discussions held during meetings, teleconferences and email exchanges throughout 2014.

Based on the final esults of the Second Workshop of the WWAP Working Group on Sex-disaggregated indicators (December 2014), the final list of questions app oved for this questionnaire was transcribed by Roselie Shonewille and co-edited by Roselie Schonewille and Vasudha Pangare, under the editorial coordination of Francesca Greco.

INDICATOR 1 | WATER GOVERNANCE

| INDICATOR 1a | Number of M/F paid staff in public water governance agencies, disaggregated by job category/level |
|--------------|--|
| | and decision-making capacity (and salary if available), at: national level; county/province/state level; |
| | town/village level (sample). |

Methodology: Fact finding through desk study of records and documentation of recruitment process and Human Resources policy; interviews with key informants to obtain information regarding relevant documents and information.

Questions:

What is the number of M/F in various positions, what are their roles and responsibilities and what are their job specifications?

| M/F | Position | Role and responsibility | Job specification |
|-----|----------|-------------------------|-------------------|
| | | | |
| | | | |
| | | | |

| | | _ |
|---|----|----|
| (| ΞĒ | 孠) |
| 1 | | 9 |
| | | |

What is the process of recruitment and the selection of staff? Where are positions 1a.2 advertised? What are the Terms of References (TOR) for hiring people?

What type of training is given to new and old staff? What are the capacity building opportunities offered to M/F staff, particularly with respect to upward mobility?

LEGEND OF SYMBOLS

Consider using mobile phones when possible, according to the rules of the Guidelines, depending on the size of population sample, freedom of use of mobile devices and/or diffusion of mobile phones among the population sample. If mobile-phone inquiry is not possible, please proceed personally.

While sex-disaggregated data are collected through this questionnaire, it can also occur in mixed environments. In these particular cases, women and men need to be interviewed in a separate environment. Please, see the guideline for more information on how to proceed.

Information need to be validated at different levels. Please refer to the Guidelines on how to proceed.

| INDICATOR 1b Number of M/F in paid and unpaid positions in local water governance formally structured entities (water users associations, etc.) at town/village level (sample); disaggregated by nature of relationship to the entity (e.g. 'member', 'board', 'executive', 'lear ership', 'decision-making group', etc.) and types of tasks. Methodology: Fact finding through desk study of records; Focus Group Discussions with members of these groups and associations; interviews with key informants identified as important sources of information during the FDGs. Questions: 1b.1 What is the number of M/F in various positions, what are their roles and responsibilities and whare their job specifications? M/F | 1a.4 What are th | e constraints in the recruitment | and selection process of Ma | /F for different positions? |

| INDICATOR 1d | M/F perceptions of gender discrimination (or equality) regarding women's participa- |
|--------------|---|
| | tion in decision-making entities. |
| | |

Methodology: Fact finding through desk study of attendance records, minutes of meetings and other relevant documentation in the form of communication, circulars, correspondence, etc. for tracking the decision-making process; Focus Group Discussions with members; interview with key informants; validation by cross-checking information obtained through multiple sources.

Tip: Have separate focus group discussions and interviews for men and women.

Questions:

1d.1 What positions do M/F staff have in decision-making entities? What is their type of participation?

| M/F | Position | Type of participation |
|-----|----------|-----------------------|
| | | |
| | | |
| | | |

| 1d.2 What are the differences in views and opinions of M/F, if any? Was this difference evident in the discussions? Were there any discussions about the differences? How were disagreements resolved? | e |
|--|---|
| | |
| | |
| | |
| 1d.3 Is there evidence that certain decisions were taken through participation by both men and women? Why, if not, is it felt that men's or women's views are given more importance? | |
| | |
| | |
| | |

1d.4 On a scale from 1 to 10, how much do you think women are discriminated in water-decision making participation? (10= highly discriminated)

| M/F | Position | Perception of discrimination from 1 to 10 |
|-----|----------|---|
| | | |
| | | |
| | | |

| INDICATOR 1e | Number of M/F staff responsible for water issues (disaggregated by job level) in |
|--------------|--|
| | gender ministry/lead agency |

Methodology: Fact finding through desk study of employment records; interviews with key informants such as those responsible for recruitment as well as relevant department heads and those in position of responsibility, and any other individuals identified through the survey of records.

Role and responsibility

Job specification

Questions:

M/F

Position

1e.1 What is the number of M/F in positions related to water issues, what are their roles and responsibilities and what are their job specifications?

INDICATOR 2 | SAFE DRINKING WATER, SANITATION AND HYGIENE

Note: All the questions for Indicators 2a,b, and c can be compiled as an intra-household survey questionnaire to be administered by an interviewer or given as a self-assessment form for household members to complete. In order to administer the questions, the first step would be to identify the households without water on the premises, in rural and urban areas, through census or similar government records, and take a sample of these households to include in the survey.

A similar approach could be used for Indicators 2d, e, f and g on sanitation.

A structured self-assessment tool could be prepared consisting of the question below by putting them in a form, and given to interviewees to fill in, if personal household visits are not possible. This can only be done if the interviewees are able to read and write.

| INDICATOR 2a | Percentage of households without water on premises, by sex of main person responsi- |
|--------------|---|
| | ble for collecting drinking water and by type of household (using rural/urban samples). |

Alert for indicator 2a,b, and c: Records may not be accurate or reflect the current situation. If you go to a household that has water on the premises, even though the record says differently, then substitute that household with another household. The sample should include only households without water on the premises.

Questions:

2a.1 What is the percentage of households without water on premises (as per records)?

| | Number | Percentage of total households |
|--------------------------------------|--------|-----------------------------------|
| Households without water on premises | | |
| Sample selected | | |

| 2a.2 which r | Does the household have water on the premises? If the household has no water on the premises, nember of the household is responsible for the collection of water (M/F, age)? |
|-----------------|--|
| | |

| INDICATOR 2b | Unpaid time spent by individual household members in supplying water, making it |
|--------------|---|
| | safe for use, and managing it (M/F informants). |

Methodology: Interviews with household members through an intra-household survey.

Tip: Talk to both men and women in the household.

Questions:

2b.1 What is the amount of unpaid time spent in supplying (obtaining, collecting, transporting the water from the source to the house) water, making it safe and managing it at the intra-household level? Please answer the question per household member.

| Household member | Time spent on supply* | Time spent on making it safe for use | Time spent on managing** water at |
|------------------|-----------------------|--------------------------------------|-----------------------------------|
| | | | intra-household level |
| | | | |
| | | | |
| | | | |

^{*} collecting, obtaining, purchasing, and transporting water to the house.

| use an | d/or consumption? | | |
|--------|-------------------|--|------|
| | | | |
| | | | |

| INDICATOR 2c | M/F perceptions of the adequacy of current water supply/availability in both quality |
|--------------|--|
| | and quantity in the household. |

Methodology: Interviews with household members, men and women, of different ages.

Questions:

2c.1 What is the level of satisfaction with the quantity of water? On a scale of 1 to 10, with 1 being least satisfied and 10 being most satisfied.

| M/F | Age | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|-----|-----|---|---|---|---|---|---|---|---|---|----|
| | | | | | | | | | | | |
| | | | | | | | | | | | |

2c.2 What is the level of satisfaction with the quality of water? On a scale of 1 to 10, with 1 being least satisfied and 10 being most satisfied.

| | M/F | Age | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|---|-----|-----|---|---|---|---|---|---|---|---|---|----|
| | | | | | | | | | | | | |
| ſ | | | | | | | | | | | | |

INDICATOR 2e Intra-household M/F use of/access to improved sanitation facilities.

Methodology: Interviews with household members.

Questions:

2e.1 What is the total number of members in the household? Who uses the sanitation facility in the house? (M/F adults, children, guests, others, nobody.) If the facility is not used, what are the reasons for not using it?

INDICATOR 2f M/F prioritization of gaining access to improved sanitation facilities; willingness to allocate household budget for such access.

Methodology: Interviews with household members.

Tip: Interview M/F separately.

Ouestions:

2f.2

2f.1 How often is the sanitation facility used? (Every day, often, rarely)

Are you willing to pay for an (extra) toilet in the house?

INDICATOR 2g M/F perception of the safety of sanitation facilities that are located outside the house; identified particular safety concern.

Methodology: Fact finding and observation to view the location and condition of the sanitation facility, and interviews with household members.

Tip: Interview M/F separately.

Questions:

2g.1 What are your perceptions of safety in using the toilet located outside house?

On a scale of 1 to 10, with 1 being least satisfied and 10 being most satisfied.

| M/F | Age | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|-----|-----|---|---|---|---|---|---|---|---|---|----|
| | | | | | | | | | | | |
| | | | | | | | | | | | |

2g.2 What is the perception of safety in using the communal toilet? On a scale of 1 to 10, with 1 being least satisfied and 10 being most satisfied.

| M/F | Age | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|-----|-----|---|---|---|---|---|---|---|---|---|----|
| | | | | | | | | | | | |
| | | | | | | | | | | | |

| | What are the main concerns related to safety? (List main concerns by importance as red by M/F household members) |
|--|--|
| | |

INDICATOR 3 | DECISION-MAKING AND KNOWLEDGE PRODUCTION

Note: Indicators 3a, b and c concern decision-making and knowledge production at the international level. Indicators 3d, e, f and g concern decision-making and knowledge at the intra-household level.

| INDICATOR 3a | M/F participation in past decade of two major global international water meetings |
|--------------|--|
| | (and nationally significant comparable meetings): World Water Week (Stockholm); |
| | World water Forum (World Water Council) (could be topic specific or region specific. |

Methodology: Fact finding through desk study of records of participants; interviews with the organizers of the specific conferences and officials of the convening organizations.

Questions:

3a.1 What are the numbers of M/F participants and in which capacity did they participate? (Panel members/chairs/presenters/contributors/submitted papers/etc.)

| M/F participant | No. of participants | Capacity of participant |
|-----------------|---------------------|-------------------------|
| | | |
| | | |
| | | |

| 3a.2 | What efforts are made, if any, to increase the | e number of female partici | pants, and to improve the |

| Ħ | 3e.2 | How are decisions taken related to the use of water in the household? What are the M/F perceptions on the prioritization of water use and what are the differences of opinion about water use? |
|---|---------------|--|
| | 3e.3 membe | Does the primary decision-maker take into account views and opinions of other family ers? How are possible differences resolved? |
| | | |

INDICATOR 3f M/F expressed priorities for water use within households.

Methodology: Interviews with household members; structured self-assessment if possible.

Note: Priorities of water use could be different from the current patterns of water use, as identified by Indicator 3d. Use this question to identify the disparity between these two.

Questions:

3f.1 List the priorities for water for use for M/F household members.

| Use | No. of priority M | No. of priority F |
|-----|-------------------|-------------------|
| | | |
| | | |
| | | |
| | | |
| | | |

| INDICATOR 3g | M/F perceptions of household gender equality in water decisions. |
|--------------|--|
| | |

Methodology: Interviews with household members; structured self-assessment if possible.

Tip: Interviewer/researcher would need to build trust with family members before discussing these questions.

| Quest | ions: | | | |
|---------------|---|---|--|--|
| 3g.1 | What is the process of decision-making related to water in the household? | | | |
| | | | | |
| | | | | |
| 3g.2 taken | What are the | e perceptions of M/F household-members tion? | on whether their views and opinions are | |
| | | | | |
| | | | | |
| | _ | ale from 1 to 10, how much do you think king participation in your household? (10= | | |

| | | | | |
| | | | | |
| | | | | |

INDICATOR 4 | TRANSBOUNDARY WATER RESOURCES MANAGEMENT

| INDICATOR 4a | Number of M/F staff on transboundary water commissions (sample for pilot |
|--------------|--|
| | countries), disaggregated by job category/level and decision making capacity |
| | (and salary, if available). |
| | |

Methodology: Fact finding through desk study of documents and records of HR department and recruitment policy; interviews with heads of relevant department in government.

Questions:

4a.1 List the number of M/F staff disaggregated by job categories and position. If possible, also note the salary paid to M/F for various positions.

| Job category | Top level No. M/No. F | Middle level No. M/No. F | Lower level No. M/No. F |
|----------------|--------------------------|-----------------------------|----------------------------|
| Executive | | | |
| Consultant | | | |
| Technician | | | |
| Administrative | | | |

4a.2 What is the M/F staff contribution/involvement in decision-making processes as per job position?

| M/F | Position | Involvement in decision-making |
|-----|----------|--------------------------------|
| | | |
| | | |
| | | |

4a.3 What is the perception of M/F staff regarding women's involvement/contribution in decision-making processes? On a scale of 1 to 10, with 1 being least involved and 10 being most involved

| M/F | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|-----|---|---|---|---|---|---|---|---|---|----|
| | | | | | | | | | | |
| | | | | | | | | | | |

| 4a.4 | What is the process for staff recruitment? Where are positions advertised? What are the Terms of |
|---------|--|
| Referer | nces (TOR) for hiring people? |
| | |

| INDICATOR 4b | The extent to which gender outcomes and gender sensitive accountability |
|--------------|--|
| | indicators are included in M&E/impact statements/benefits analysis of trans- |
| | boundary agreements/activities. |

Methodology: Fact finding through desk study of M&E records, impact statements, agreements and work plans; interviews with M&E officials and the technical people involved.

| 4b.1 | Identify and assess the gender-sensitive indicators, if any, in M&E plans. |
|----------------|--|
| | |
| | |
| | |
| 4b.2 | What are the gender outcomes recorded/measured in M&E reports and impact statements? |
| | |
| 4b.3. I | Is there inclusion of analysis of gender outcomes in M&E impact statements and agreements? |
| | |
| 4b.4 | What are the accountability mechanisms, if any, related to gender outcomes? |
| | |
| 4b.5 adding | Describe the process for obtaining and integrating inputs in M&E plans; is there an opening gender sensitive indicators? |
| | |
| 4b.6 | Is there a mention of M/F target group in impact statements and agreements? |
| | |

INDICATOR 5 | WATER FOR INCOME GENERATION FOR INDUSTRIAL AND AGRICULTURAL USES, INCLUDING UNACCOUNTED-FOR LABOUR

| INDICATOR 5a | % irrigated farms in region under survey; % irrigated farms managed by/owned |
|--------------|--|
| | by M/F. |

Methodology: Fact finding from census and other government/non-government records. Interviews for ownership information.

Alert: Depending on where the questionnaire is administered, the researcher will have to decide how to obtain relevant information regarding % of irrigated land, ownership, and average size of irrigated farm. Verification of records may be necessary before doing household and community level interviews. Interviews may be necessary with key informants.

Questions:

| 5a.1 | What is the % of irrigated land in the region? (can use FAO data) ¹ |
|------|--|
| | |
| | |
| | |

5a.2 State the ownership M/F and ownership type (private/family/business/common land/type of association/cooperation/etc.)

| Ownership M/F | Ownership type |
|---------------|----------------|
| | |
| | |
| | |

| INDICATOR 5b | Average size of irrigated farms run by/owned by women/men. |
|--------------|--|
|--------------|--|

Methodology: Fact finding; interview with head of each individual farm.

Alert: Depending on where the questionnaire is administered, the researcher will have to decide how to obtain relevant information regarding % of irrigated land, ownership, and average size of irrigated farm. Verification of records may be necessary before doing intra-household and community-level interviews.
